ARCHITECTURE OF THE COSMOS – Spectra of Reality

More Local

More Non-Local

Spectrum of Reality, increasingly finer (many discrete frequencies)

Gross / Material / Physical
Linear Space and Time
Physical bodies, planets, stars, solar systems, galaxies, etc.
Electromagnetic Spectrum, photons, quarks, subatomic particles

Crossing Point – from physicality and materiality into the finer sub-electromagnetic field

Sub-Electromagnetic Spectrum
Non-local, and allows instantaneous communication via thought

GAP

ABSOLUTE FIELD
Unbounded Mind/Consciousness/Intelligence
Creator State
"Great Mind" or "God"
