While enroute from Great Falls, Montana, to Fairfield-Suisun AF on the night of 30 Dec 47, a possible rocket sighting was made by pilot (Lt Col W. W. Jones, Hq. EPW) and co-pilot (Maj A. A. Andrae, Hq., EPW) Airplane was cruising at 13000 ft. An unidentifiable object trailing green and blue flames was viewed for a period of 2 seconds. The object was descending vertically at a very high rate of speed and seemed to slow down slightly upon nearing the ground. The object appeared at a position of 2:30 o'clock in relation to the plane and the flames were intensely bright.

Fairfield-Suisun AAFld, Calif
ATTN: AC/S, A-2

1. While on an administrative flight from Great Falls, Montana, to Fairfield-Suisun Airfield, on the night of 30 December 1947, a possible rocket sighting was made by the Pilot (Lt Col W W Jones, HQ, EPW) and the co-pilot (Major A A Andrae, HQ, EPW) of the C-54 airplane. Observation was made at 1926 Pacific Standard Time, location $42^{\circ} 09.3' N$ $114^{\circ} 22.2' W$. The airplane was cruising at 13000 feet. An unidentified object, trailing green and blue flames, was viewed for a period of two seconds. The object was descending vertically at a very high rate of speed and seemed to slow down slightly upon nearing the ground. The object appeared at a position of 2:00 o'clock in relation to the airplane and the flames were intensely bright.

2. A report was received at the Fairfield-Suisun tower from the McClellan Airfield tower at Sacramento stating a report had been received from Sacramento Air Depot C-47 #7483 flying near Rosedale, California, to the effect that an object was sighted at 1925 Pacific Standard time trailing several colors of flame with red and green predominating. The object was travelling at a very high speed and low altitude eastward toward some hills at approximately $38^{\circ} 50' N$, $121^{\circ} 02' W$. McClellan tower asked the pilot to investigate and at 1933 the pilot reported a small fire at $38^{\circ} 50' N$ and $120^{\circ} 53' W$ which became considerably larger. Fairfield tower requested a local night flying C-47 to also investigate the fire for a possible aircraft accident and the pilot reported over the fire at 1937 Pacific Standard Time at a position of $38^{\circ} 50' N$ and $120^{\circ} 53' W$. The fire was burning in a triangular shape over a small area and went out at 2155. Two particular points in the fire seemed to burn with a bright blue green flame.

As a result of the above activity on 30 December 1947, Air Sea Rescue located at Hamilton Field was notified and it is understood

✓ they would dispatch an airplane to the scene of the fire. The California Highway Patrol was dispatched to the scene of the fire and their findings will be reported as soon as possible.

3. The Fairfield control tower obtained a report at approximately 2300 PST, 30 December 1947, from Hamilton Field Flight Control, that a motorist on U.S. Highway #40, thirty miles west of Lovelock, Nevada, approximately 39° 53' N, 118° 53' W had seen an object explode in the air at 1926, 1200 to 1300 feet in the air.

4. The Fairfield Control tower obtained a report from Oakland Airport Flight Control (CAA), at approximately 2315 PST, 30 December 1947, that United Airlines Flight 191 proceeding on airways between Medford, Oregon and Mount Shasta observed a flash at 1925 PST just north of their position.

✓ 5. Subsequent information on the above incidents will be sought and reported.

Extract from Weekly Intelligence Summary, Hq, ATC, dtd 1-14-48

UNIDENTIFIED AIR OBJECTS: The A-2 of the Eastern Pacific Wing, Pacific Division, Air Transport Command reports the following four observations of unidentified air objects all occurring in the western states at 1925 or 1926 hours Pacific Standard Time (PST) on 30 December 1947.

While on an administrative flight from Great Falls, Montana, to Fairfield-Suisun Airfield, on the night of 30 December 1947, a possible rocket sighting was made by the pilot, Lt. Col. W. W. Jones, Hq, EPW and the co-pilot, Major A. A. Andrae, Hq, EPW of a C-54 airplane. At 1926 hours PST, location 42° 09.3' North, 114° 22.2 West (near the meeting point of the Nevada, Utah and Idaho state borders) while cruising at 13000 feet an unidentified object, trailing green and blue flames, was viewed for a period of two seconds. The object was descending vertically at a very high rate of speed and seemed to slow down slightly upon nearing the ground. The object appeared at a position of 2:30 o'clock in relation to the airplane and the flames were intensely bright.

A report was received at the Fairfield-Suisun tower from the McClellan Airfield tower at Sacramento stating a report had been received from Sacramento Air Depot C-47 #7488 flying near Rosedale, California, to the effect that an object was sighted at 1925 hours PST trailing several colors of flame with red and green predominating. The object was travelling at a very high speed and low altitude eastward toward some hills Northwest of Sacramento at approximately 33° 50' North, 121° 53' West which became considerably larger. Fairfield tower requested a local night flying C-47 to also investigate the fire for a possible aircraft accident and the pilot reported over the fire at 1934 hours PST at a position of 33° 50' North and 120° 53' West. The fire was burning in a triangular shape over a small area and went out at 2155. Two particular points in the fire seemed to burn with a bright blue green flame.

The Fairfield control tower obtained a report at approximately 2300 hours PST, 30 December 1947, from Hamilton Field Flight Control, that at 1926 hours a motorist on US Highway #40, thirty miles West of Lovelock, Nevada, approximately 39° 53' North, 118° 53' West had seen an object explode in air at an altitude of 1200 to 1300 feet.

The Fairfield Control tower obtained a report from Oakland Airport Flight Control (CAA), at approximately 2315 hours PST, 30 December 1947, that United Airlines Flight 191 proceeding on airways between Medford, Oregon and Mount Shasta, California, observed a flash at 1925 hours PST just North of their position.

E. CONCLUSIONS

Detailed conclusions will be submitted in the final report. It is too early to state specific conclusions, except for a few incidents, but it seems likely at this stage of the work that more than one quarter of the incidents may be explainable as astronomical phenomena.

Positive identification of incidents 94 through 97 has been established. A fireball, reported in Popular Astronomy (October, 1948), observed to travel over southern Oregon and seen also in parts of California and Nevada, coincides exactly with the information reported in these incidents.

There can be no question but that these "flying saucers", at least, were a bona fide fireball. Since the description in these reports is similar to those in several others, the inference that the latter also were fireballs is strengthened.

SUBJECT: Spot Report on Possible Missile Sighting

SUMMARY OF INFORMATION: While on an administrative flight from Orosi Field, California, to Fairfield-Suisun Airfield, on the night of 30 Dec 47, a possible missile sighting was made by the pilot and recorded on the C-54 clipboard. Observation was made at 1926 Pacific Standard Time, location $122^{\circ} 07' 31''$ $116^{\circ} 22' 21''$. The airplane was cruising at 13,000 feet. An unidentified object, trailing green and blue flames, was viewed for a period of two seconds. The object was descending vertically at a very high rate of speed and seemed to slow down slightly upon nearing the ground. The object appeared at a position of 2:30 o'clock in relation to the airplane and the flames were intensely bright.

A report was received at the Fairfield-Suisun tower from the MacAllister Airfield tower at Sacramento stating a report had been received from Sacramento Air Depot C-47 #7663 flying near Roseville, California, to the effect that an object was sighted at 1925 Pacific Standard Time trailing several colors of flame with red and green predominating. The object was travelling at a very high speed and low altitude. Contact was made with an approximately $36^{\circ} 50' N$, $121^{\circ} 02' W$. MacAllister tower asked the pilot to investigate and at 1952 the pilot reported a small fire at $36^{\circ} 50' N$ and $121^{\circ} 51' W$ which became considerably larger. Fairfield tower requested a local night flying C-47 to also investigate the fire for a possible aircraft accident and the pilot reported over the fire at 1937 Pacific Standard Time at a position of $36^{\circ} 50' N$ and $121^{\circ} 51' W$. The fire was burning in a triangular shape over a small area and went out at 2155. Two particular points in the fire seemed to burn with a bright blue green flame.

As a result of the above activity on 30 December 1947, Air-Sea Rescue based at Hamilton Field was notified and it is understood they would dispatch an airplane to the scene of the fire. The California Highway Patrol was dispatched to the scene of the fire and their findings will be reported as soon as possible.

The Fairfield control tower obtained a report at approximately 2300 HRT, 30 December 1947, from Hamilton Field Flight Control, that a motorist on U.S. Highway #40, thirty miles West of Lovelock, Nevada, approximately $38^{\circ} 51' N$, $116^{\circ} 51' W$ had seen an object explode in the air at 1926, 1200 to 1300 feet in the air.

A handwritten signature in dark ink, appearing to read 'W. K. F.' with a stylized flourish at the end.

25. Nature of observations confirmed
26. Remarks: (over)

The Fairfield control tower obtained a report at approximately 2300 EST.
31 Dec 47 from Hamilton Rd. Light Control, that a pilot on US Highway #40
10 miles west of Lovelock, Nevada, (approximately 118° 51' E, 118° 51' W)
had seen an object explode in the air at 1925, 1200 to 1300 feet in the air.

Would appear to be connected with incidents 88, 94, 95 and 97.

RECEIVED R7C

The Fairchild Control tower obtained a report from Oakland Airport Flight Control (OAK) at approximately 2315 PST, 30 Dec 1947 that United Airlines Flight 191 proceeding on airways between Medford, Oregon, and Mt. Shasta observed a flash at 1925 PST just north of their position.

See incidents 94, 95, & 96.

DECLASSIFIED

[REDACTED]

UNCLASSIFIED

Incident #94 -- $42^{\circ} 9.3' N$, $114^{\circ} 22.2' W$ -- 30 December 1947

This incident and incidents #95, 96, and 97, which describe the same object, clearly refer to a thoroughly authenticated fireball. These sightings can be dismissed with finality by the following quotation from Popular Astronomy, October, 1948:

Fireball of 1947 -- Dec. 30
Nancy E. Weber

On this date at 7:30 P. M. PST a brilliant fireball appeared travelling westward over southern Oregon. ... Prof. J. Hugh Pruett gathered numerous reports from observers in Oregon, California, and Nevada, and from these made an appropriate solution for the path. He sent both his solution and all the 47 reports to the Flower Observatory where another solution was independently made. Ours agreed closely in all respects with that of Pruett except for the heights.

The meteor was most generally reported to be bluish-green in color. It appeared to explode twice, lighting up the countryside to close observers.

The sound phenomena were limited to 6 out of the 47 observers.

From the height at which the meteor exploded it is doubtful whether any fragments reached the ground.

It is clear from the general agreement with this of evidence given in incidents #94-97 inclusive that this fireball was the object being described.

[REDACTED]

[REDACTED]

[REDACTED]

UNCLASSIFIED

Incident #95 -- Rosedale, California -- 30 December 1947

The description given here refers to an authenticated fireball. See report on incident #94 for details.

It is likely that the fire observed on the ground by viewers of this incident had no connection with the fireball, but it is not out of the question that a fragment of the bolide did land and cause a brush fire.

UNCLASSIFIED

[REDACTED]

[REDACTED]

[REDACTED]

UNCLASSIFIED

Incident #96 -- near Lovelock, Nevada -- 30 December 1947

The explosion seen in this incident was undoubtedly that of the fireball discussed in detail in the report on incident #94.

UNCLASSIFIED

[REDACTED]

[REDACTED]

[REDACTED]

UNCLASSIFIED

Incident #97 -- between Medford, Ore., and Mt. Shasta, Calif. -- 30 Dec 1947

The flash or explosion referred to here agrees also in time and location (no other details are given) with that of the fireball described in detail in the report on incident #94.

HEADQUARTERS, AIR WEATHER SERVICE Andrews Air Force Base, Wash-
ington 25, D. C.

TO: Commanding General, Air Materiel Command, Wright-Patterson
Air Force Base, Dayton, Ohio
ATTN: MCIAKO

Investigations by this headquarters reveal that a synoptic
weather balloon could have been at the location where sightings
were reported in the following incidents. In compiling this
list consideration was given to the wind direction and speed at
the surface and aloft at the scheduled time of balloon release, and
the location of the nearest weather station making balloon obser-
vations.

SUBJECT: Project "SIGN"

TO: Chief, Air Weather Service,
Andrews Air Force Base,
Washington 25, D. C.
ATTN: DSS

1. Project "SIGN" is responsible for the collection, investigation and interpretation of data relative to sighting of unidentified flying objects. Attached Incident Summaries 1 thru 172 from the files of Project "SIGN" are forwarded for study and recommendations as to which of the incidents may be eliminated as balloons released on routine synoptic ascents by the Air Weather Service, the Navy Aerological Service or the United States Weather Bureau. The summaries attached may be retained in your headquarters for working and reference purposes.

2. The Air Weather Service is the only agency of its type that has been asked to assist in the accomplishment of Project "SIGN" except that the United States Weather Bureau has provided information on ball lightning. Research projects in which balloons are used and which are conducted or sponsored by the Army, Navy or United States Air Force are checked by the Intelligence Department of this Command. These checks are usually made direct from the Project "SIGN" Office, MCIAKO-3. These checks are distinct from the check of synoptic balloon flights made by weather service stations of the Air Force, the Navy and the Department of Commerce. (U. S. Weather Bureau) requested of Air Weather Service.

3. It is the opinion of this office that the below listed incidents are those having the greatest possibility of being balloons. This list does not eliminate the possibility that many of the remaining incidents are balloons.

2	24	50	91	113	155
3	25	52	92	115	156

Hq AMC, Chief, Air Weather Service, Washington 25, D. C.
Subj: Project "SIGR"

4. The form used in interrogating witnesses to sightings is inclosed as a matter of interest. Comment as to possible improvement of the "Essential Elements of Information" in regard to routine synoptic balloon flights is invited.

5. It is requested that correspondence be forwarded to the Commanding General, Headquarters, Air Materiel Command, attention MCIAXO-3.
