

*******Organization of Team Work*******

1. Task: create a **Review Guide** for materials covered in Ch1-8.
2. Students voluntarily form groups with 5 to 10 divisions in a group.
3. Each group should elect its group leader. The group leader is responsible for leading his/her group to complete the task. Each group member is required to participate in the team work and to contribute his/her effort to assist the group leader to complete the task.
4. The report of the team work must include the following **2** items:
 - 1) Review Guide
 - 2) List of the names and student IDs of the group leader and group members **with signatures**
(The names and IDs should be typed clearly. I will use this list to assign the 5 points accordingly.)

The 2 items should be turned-in **in 2 separate electronic files** (PDF, or JPEG file format) as email attachments (span@uh.edu) before **Dec. 8th, 2015**, so that I can post the Review Guides on the MasteringPhysics website for other students to use as references for preparing for the final exam on Dec. 15th.

NO TEAM WORK SCORE (the 5%) WILL BE GIVEN IF THE REPORT IS RECEIVED AFTER THE DUE DATE!

(I will post these Review Guides on MaterPhysics under <Document Sharing>.)
